Students-

Although our campus is subject to less-stringent COVID-19 precautions this semester, it's important to remember that a pandemic still exists. The COVID-19 virus remains highly transmissible and you should expect a continued possibility of exposure when on-campus and/or in the classroom.

Here are a few helpful reminders to help you safely navigate the semester:

If you experience COVID-19 symptoms:

- Do not come to campus; remain at home or in your residence hall room
- Complete a COVID test at home or via an off-campus provider
 - The University no longer offers on-campus COVID testing
- If you MUST leave your home or room, wear a facemask over both your mouth and nose

If you test positive for COVID-19:

- **Complete the University's MANDATORY [self-reporting form](#)**
- Return home, if possible, or remain in your residence hall room and remain there for a minimum of 5 days
 - Foodservice will be provided to students quarantining on-campus
- You may end isolation after day 5 if:
 - You are fever-free for 24 hours (without the use of fever-reducing medication); and
 - Your other symptoms have improved (e.g. cough, shortness of breath); and
 - At least 5 days have passed since symptoms first appeared.
- You should continue to wear a mask when around others on days 6-10, post-isolation.

Remember we each have an individual responsibility not only to protect ourselves but also to act responsibly and respectfully around all members of the Concordia-Chicago community. Together we can limit the spread of COVID-19 this semester and beyond.
